

Our La-Z-Boy Furniture Galleries Franchise opened its flagship store eleven years ago and enlisted the services of the Informat Style Team. The decision was an easy one for our owners as Informat Style Software provided a full retail solution that included the set-up of all hardware on site and the necessary training on all systems to ensure a smooth opening. Our operation has grown substantially over the last eleven years and many times we've relied on their services to develop, modify and create new software that keeps us on the cutting edge. For example, in the last two years we opened five additional La-Z-Boy Furniture Galleries Stores that operated previously with Style Software. Informat played an integral part in the amalgamation of the newly acquired inventory, the transfer of all supplier purchase orders and customer sales transactions into our system. This enabled a smooth transition and provided our newly acquired customers with the service they expect behind our brand.

The Style Team has always been available to us to provide support when needed and often go above and beyond the call of duty to ensure that project deadlines are met. The Informat yearly Support and Maintenance Contract makes it easy to budget for expenses and provides us with important updates of the most recently developed programs. Informat 's software allows us to run our business as efficiently and effectively as possible, giving our staff the tools to provide our customers with an excellent customer experience each and every time.

In working with the Informat Team for over eleven years I feel that any retailer looking for a full business solution in software and technical support services will not be disappointed.

Looking forward to future successes!

Janet Graham
Controller
La-Z-Boy Furniture Galleries – GTA, London and Kitchener
